

RELEASE!

DevOps Expansion

This expansion celebrates the collaboration in DevOps by replacing the base scoring mechanic with a new, collaborative scoring. Note that this expansion is only compatible when pair programming (team play).

Installation Instructions

To install this expansion, set aside the Development Methods (Dev) and Operations Tools (Ops) decks, and then replace these 3 play cards with 3 matching base play cards. The base Tools & Methods cards are not used with this expansion.

Each release, instead of drawing a Tools & Methods card, one player on each team draws a Dev card and the teammate draws an Ops card. These cards are private and, like your hand, may not be revealed or discussed with other players.

When scoring artifacts, players reveal their Dev and Ops cards. Teammates then combine their artifacts and tabulate their score by using the rules on the Dev and Ops cards. After scoring, shuffle both the Dev and Ops deck.
