

Support Plug-in

sponsored by: iTok

Installation Instructions

*These support cards offer players some unique ways to commit their cards. **This plug-in is only compatible with 2-6 players.***

Set aside the support deck; each release, after dealing hands, shuffle the support deck and deal one card to each player. This card is kept secret. Before a player commits a card to an iteration, they may reveal their support card to designate the card they will commit as supported. This will activate the card's special support ability. Support cards are discarded after use.

SUPPORT TICKET

The supported card ranks 3 higher than its current rank.

note: this only counts during iterations

SCREEN SHARING

The supported card may be committed even if it is not the led suit.

note: this is still considered breaking suit
